

Pricing for Line Item Codes

Last Modified on 08/09/2022 11:25 am EDT

Line Item Code Pricing

Each line item code (LIC) typically has a default price set at the LIC level. You can also set up volume pricing at the LIC level.

For details, refer to these topics:

Rate Cards for Special Pricing

For more complex pricing schemes, you can use rate cards. They allow you to set up special pricing structures that can be attached to a single order or a specific customer. They also enable "scenario-based" pricing.

For details, refer to these topics:
