Accessing aACE from Your Computer

Last Modified on 04/05/2022 1:11 pm EDT

Welcome to aACE!

Start using aACE with these three simple steps:

Coordinate with Your System Administrator

You need to have several details prepared in order to access aACE.

Work with your system administrator to make sure everything is ready (http://aace5.knowledgeowl.com/help/coordinating-with-your-system-administrator-on-your-aace-setup).

Install FileMaker

If you already have FileMaker on your computer, skip to the Step 3.

If you don't have FileMaker installed yet, complete the FileMaker installation process (https://aace5.knowledgeowl.com/help/installing-the-filemaker-client-fm19).

Obtain an aACE Launcher

Use an aACE launcher to directly open aACE, bypassing the standard FileMaker dialogs and saving time.

You can get a launcher in two ways:

- Sent from your system administrator — Save the launch file to your desktop, unzip it, then use it to access aACE.
- Download from aACE — Download the launch file (http://aace5.knowledgeowl.com/help/downloading-an-aace-launcher), unzip it, then use it to access aACE.
