

Step 5: Data Migration

Last Modified on 10/03/2019 12:39 pm EDT

Properly migrating your data to aACE is critical to having a fully functional system. Careful planning is needed prior to the actual migration. Your aACE partner will meet with you to map out a customized plan for this phase.

Learn more about data migration in the following topics:

- [Overview of the aACE Data Migration Process](#) – Explains the different data types (entity and transaction) and the different approaches to data migration.
 - [Data You Can Import into aACE](#) – Lists the modules you can import data to and best practices for importing simple data (e.g. chart of accounts, contacts, prospecting lists, etc).
 - [Preparing a File for Importing](#) – Outlines the steps for preparing your simple data for import.
-
