Setting Up ReadyCloud

Last Modified on 03/11/2021 11:11 am EST

> This guide explains steps for connecting your aACE system with ReadyCloud. It is intended for system administrators.

The aACE+ ReadyCloud integration lets you connect with many of the top ecommerce sites, and also leverages ReadyShipper functionality. For an example of how this functionality can help your team, read our feature highlight (https://www.aacesoft.com/resources/streamline-your-shipping-process-with-aace-readycloud).

To set up your ReadyCloud integration, complete the following steps. (Note: If you are already using ReadyShipper, skip to Step 3.)

Step 1: Sign Up for ReadyCloud

Create a ReadyCloud (https://www.readycloud.com/accounts/signup/) account.

Step 2: Authorize aACE to Access ReadyCloud

1. Log into your **ReadyCloud account**.
2. In the top-right corner of the website, click the **Power** symbol, select **Settings** from the drop-down menu, and click the **My Apps** tab.
3. In the App Name field, enter **"aACE"** and click **+ Add App**. (The Redirect URI field should remain blank.)
   This generates an app with an App ID, App Secret, and Redirect URI fields. Note the exact App ID for use in following steps.
4. Open a new tab in your web browser, paste the following address in the address bar, and edit it — replace "AppID" with the actual App ID provided in the prior steps — then go to that updated address:
   ```
   https://www.readycloud.com/api/v1/oauth2/authorize?response_type=token&client_id=AppId
   ```
5. At the prompt to grant aACE access to your ReadyCloud account, click **Allow Access**.
6. At the Bearer Token page, note the exact Bearer Token for use in following steps.

Step 3: Input Credentials into aACE

After you have installed the aACE integration file (http://aace5.knowledgeowl.com/help/installing-integration-files),

proceed with the following steps:

1. Log into aACE and navigate to **Menu** > **System Admin** > **Preferences** > **Database Management**.
2. In the Integrations section, mark the flag for **eCommerce Integration**.
3. Click the link to **Open Settings**, and in the left panel click **ReadyCloud**.
4. Mark the flag to **Enable ReadyCloud**.
5. Enter the **Bearer Token** provided in the prior steps.
6. Click **Get URL**.
7. Close the Shipping Integration Settings window.

Step 4: Activate the Automation Schedules

If you have *not* already activated the automation schedule for eCommerce Integration:

1. Navigate to **Menu** > **System Admin** > **Preferences** > **Automation Schedules**.
2. Locate and mark the flag for **eCommerce Integration**.
   Note: You can also configure when this automation schedule will run
   (http://aace5.knowledgeowl.com/help/configuring-automation-schedules).
3. Click **Commit Updates**.
